Virtue

Herbal Medicines as Supportive Therapies for Covid-19 in Various Countries

Leature & Topies 8

UAD Universitas

1st Lecture Wen-Chi Wei Ph.D. (National Research Institute of Chinese Medicine)

> TOPIC : Herbal medicines used for Covid-19 in Taiwan

2nd Lecture

Asst. Prof. Dr. Sukanya Dej-adisai (Prince of Songkhla University, Thailand)

Topic: Herbal medicines used for Covid-19 in Thailand

3rd Lecture

Prof. Dr. apt. Nurkhasanah, M.Si (Universitas Ahmad Dahlan)

Topic: Herbal medicines used for Covid-19 in Indonesia

4th Lecture Vipavee Rodjun, B.Sc. in Pharm (Siam University, Thailand)

> Topic: Comorbid in Covid-19

E Data & Almas 6 - 7 March 2021 Live on Zoom Meeting

anjanjunjunjunjunjuni

For Students, Academia, and Practitioner

*this course is opened for those in pharmacy field (clinical pharmacy, pharmaceutical technology etc.) and those in any other related field.

bit.ly/HerbalMedicinesCourse

5th Lecture

dr. Rano Irmawan, Sp. JP (Cardiologist from PKU Gamping Hospital Yogyakarta)

Topic : **Cardiovascular Disease**

6th Lecture

apt. Amita Sari, M.Sc (Pharmacist from Ramelan Naval Hospital Surabaya)

Topic: Pharmaceutical Care on Cardiovascular Disease

In addition, there will be a following sub-events:

1. Workshop:

Using Mannequin as a Virtual Patient 2. Social Project 3. Mini colloquium for Learning of Covid-19 Comorbid

VIRTUAL COURSE ON HERBAL MEDICINES AS SUPPORTIVE THERAPIES FOR COVID-19 IN VARIOUS COUNTRIES

INTRODUCTION

The covid-19 pandemic has been creating continuous discussions and debates on the treatments since its first emergence earlier last year. Despite some vaccines have been successfully developed and will be available soon on the market, yet many countries and individuals are still using herbal medicines for covid-19 as alternative and supportive treatment. The fact that no specific treatment for covid-19 is now yet available leading many people in the community and researchers across countries trying to find the treatments including herbal medicines. Since the immune status of the patients plays an important role in covid-19 infection, the use of herbal medicines used may differ in each country as it is normally established based on the local cultures, empirically. Therefore Faculty of Pharmacy Universitas Ahmad Dahlan initiates a virtual course and invites several speakers from its partner institutions to come and give a plenary lecture to address this topic. This course aims to discuss the use of herbal medicines as supportive therapies for covid-19 in various countries. Specifically, during the lecture each speaker would share and highlight about the type of herbal medicines used in the clinical practice for covid-19 in their own country. The lecture will be conducted virtually via Zoom.

In addition, this virtual course also includes a lecture about comorbid in covid-19 and the use of mannequin as virtual patient for learning about comorbid in a patient with covid-19 infection. Also, this course accommodates a meeting between students from participated institutions to get together and share about their current researches one another in a mini colloquium. Eventually, there will be a social project about public awareness campaign of covid-19 that involves the students participating in this course at the end of the event. See below for further details.

TOPIC

"Herbal Medicines as Supportive Therapies for Covid-19 in Various Countries"

DATE & TIME

6-7 March 2021

VENUE Virtual (Zoom)

PARTICIPANT*

Student (bachelor and graduate/ post graduate program) Academia Practitioner (*this course is opened for those in pharmacy field (clinical pharmacy, pharmaceutical technology etc) and those in any other related field)

REGISTRATION: (FREE OF CHARGE)

Please access following link: <u>https://forms.gle/aR5guo9raW25T58N9</u> or Scan the QR code available in the poster of this event

SUB-EVENTS

BRIEF DESCRIPTION:

Following are sub-events of the Virtual Course on "Herbal Medicines as Supportive Therapies for Covid-19 in Various Countries"

1. WORKSHOP ON VIRTUAL MANNEQUIN

Description: A workshop on "Mannequin as a Virtual Patient for Learning of Covid-19 Comorbid" is a part of this virtual course. In this workshop, participants will learn about the use of mannequin as a virtual patient for studying about comorbid in covid-19. The workshop would be done virtually via zoom. Detail of schedule can be seen in previous page.

2. MINI COLLOQUIUM

Description: During this course there will be a colloquium session at which each university is welcome to delegate its students to give short talk on his/her current research. They can share either any update of ongoing projects or the final results. Here's the detail of this event

- Name of event: Mini-colloquium
- **Aim of event**: to give international exposure to students through a scientific meeting attended by students from various countries
- **Participants**: This mini colloquium is designed for students (graduate and undergraduate)
- **Topics**: The topics are not limited to the Corona Virus issues only. The participant is allowed to select any of following topics:
 - Pharmaceutics and pharmaceutical technology
 - Clinical pharmacy
 - Medicinal chemistry
 - Pharmaceutical chemistry
 - Pharmaceutical biology
 - Phytochemistry
 - Pharmacology and toxicology
 - Pharmacokinetics biopharmaceutics
- Practicality:
 - 1. This colloquium is opened to any undergraduate and prost-graduate students of pharmacy
 - 2. The summary of the project that will be presented should be sent to the committee at least 5 (five) days before the event.
 - 3. The committee will select students who make it to give talk on his/her research
 - 4. Time for per presentation is 10 minutes including Q&A and comments from other participants.

3. SOCIAL PROJECT (PUBLIC AWARENESS CAMPAIGN OF COVID-19)

Description: In a series of virtual courses held during the covid-19 pandemic, Faculty of Pharmacy, Universitas Ahmad Dahlan will invite virtual course participants from various countries to collaborate to create a campaign on health protocols as one of the efforts to prevent the spread of covid-19 that is increasingly widespread and affecting many countries worldwide. The campaign project will be done by creating a video about the call to comply with health protocols created by a group of virtual course participants that come from different countries. The video is then disseminated and posted through social media so that it can reach international community at large.

- Name of event: Public Awareness Campaign of Covid-19
- Target of event: The target of this campaign is international community.
- **Participants:** All participants of this virtual course 2021
